

MATERIALS PLANNING

Introduction

Solvitt materials planning will help you plan production and raise purchase orders for your raw materials.

General

- Time phased calendar in working days or weeks
- User defined horizons

Production Planning

- Generate production plans based on requirements, reorder levels, batch quantities and top up quantities
- Confirm works orders directly from plan
- Link plan to either sales or works orders

Purchasing

- Generate purchase orders automatically based on requirements, reorder levels, reorder quantities and top up quantities
- Specify preferred and alternative suppliers
- Identify purchase orders no longer required to reschedule or cancel

Drilldown

- View sales orders, including allocated and backorder
- View outstanding purchase orders
- View works orders and order status
- Navigate up and down BOM structure
- Full 'pegging' of requirements back to source
