

## **WORKS ORDERS**

### **Introduction**

Solvitt works order processing manages and controls your work in progress and allows you to track and cost your works orders.

### **Order Processing**

- Make to stock or make to order
- Link works orders to sales orders
- Raise works orders for each level of manufacture if required
- Full batch and serial traceability
- Options to backflush for process environments
- Track works orders by operation

### **Paperwork**

- Picking Lists
- Route Cards
- Operation Cards
- Job Sheets

### **Costing**

- Orders costed at materials, labour, setup, machine and overhead
- Record actual labour times and monitor variances
- Scrap and yield analysis
